Summary

Measure	Value
Tenant	11111111-2222-3333-4444-555555555555
Subscriptions	Example Production (sample) (00000000-0000-0000-0000-000000000001)
Flow observations	61
Allowed / denied	0 / 61
Bytes / packets	0 B / 0
Storage accounts read	2
Scopes in report	4
Unique source / destination IPs	25 / 20
Allowed inbound duplicates skipped	0

Monitoring: storage accounts

No storage accounts with flow logs or flow-log blobs in this run.

Monitoring: flow logs

No flow-log configs in this run.

Traffic between scopes (top 50 by bytes)

Source scope	Destination scope	Flows	Allowed	Denied	Bytes	Bytes | denied
stflowlogsdata02	Internet	16	0	16	0

Notes

- Counts are flow log observations: one per NSG or VNet flow tuple. A flow crossing two logged networks is observed at both; the duplicate allowed inbound observation is skipped.

- Offline topology from topology.json: 3 network(s), 3 prefix(es).

- Filters apply per observation: port matches destination port; IP matches source or destination text.
