Azure VNet Flow Log Report

Generated 2026-10-19T10:33:10Z. Source: local. Window: 2026-10-18T10:00:00Z to 2026-10-18T13:00:00Z.

Filters: action all, protocol TCP, ports 1433, ip -, min bytes 0.

Summary

Measure	Value
Tenant	11111111-2222-3333-4444-555555555555
Subscriptions	Example Production (sample) (00000000-0000-0000-0000-000000000001)
Flow observations	69
Allowed / denied	69 / 0
Bytes / packets	4.1 MB / 6,598
Storage accounts read	2
Scopes in report	2
Unique source / destination IPs	16 / 8
Allowed inbound duplicates skipped	69

Monitoring: storage accounts

No storage accounts with flow logs or flow-log blobs in this run.

Monitoring: flow logs

No flow-log configs in this run.

Traffic between scopes (top 50 by bytes)

Source scope	Destination scope	Flows	Allowed	Denied	Bytes	Bytes | denied
stflowlogsapp01	stflowlogsdata02	69	69	0	4,336,061	

Per storage account

stflowlogsapp01

In: 0 flows, 0 bytes. Out: 69 flows, 4,336,061 bytes. Denied: 0 flows.

Top peers: stflowlogsdata02 (4,336,061 bytes).

Top destination ports: 1433 (69 flows).

stflowlogsdata02

In: 69 flows, 4,336,061 bytes. Out: 0 flows, 0 bytes. Denied: 0 flows.

Top peers: stflowlogsapp01 (4,336,061 bytes).

Top destination ports: 1433 (69 flows).

Top flows (top 150 by bytes)

Notes

- Counts are flow log observations: one per NSG or VNet flow tuple. A flow crossing two logged networks is observed at both; the duplicate allowed inbound observation is skipped.

- Offline topology from topology.json: 3 network(s), 3 prefix(es).

- Filters apply per observation: port matches destination port; IP matches source or destination text.
