Azure VNet Flow Traffic Report

Generated 2026-10-19T08:08:38Z | Source local | Window 2026-10-18T10:00:00Z to 2026-10-18T13:00:00Z
Filters: action deny; protocol all; destination ports any; IP contains any; min bytes 0

Summary

Measure	Value
Flow observations	61
Allowed / denied	0 / 61
Bytes / packets	0 B / 0
Storage accounts read	2
Scopes in report	4
Subscriptions	0
Unique source / destination IPs	25 / 20
Allowed inbound duplicates skipped	0

Flow log monitoring

No storage account inventory in this run (local input or no accounts discovered).

Traffic between scopes (top 50 by bytes)

From	To	Flows	Allowed	Denied	Bytes	Share of bytes
stflowlogsapp01	stflowlogsdata02	31	0	31	0 B	
stflowlogsdata02	Internet	16	0	16	0 B	
vnet-hub	stflowlogsapp01	14	0	14	0 B	

Individual view per storage account

stflowlogsapp01

In: 14 flows, 0 B | Out: 31 flows, 0 B | Denied observations: 45
Top peers: vnet-hub (0 B), stflowlogsdata02 (0 B)
Top destination ports: 22/TCP (0 B), 8080/TCP (0 B)

stflowlogsdata02

In: 31 flows, 0 B | Out: 16 flows, 0 B | Denied observations: 47
Top peers: stflowlogsapp01 (0 B), Internet (0 B)
Top destination ports: 8080/TCP (0 B), 443/TCP (0 B)

Top flows (top 55 of 55 rows by bytes)

Notes

- Counts are flow log observations: one per NSG or VNet flow tuple. A flow crossing two logged networks is observed at both; the duplicate allowed inbound observation is skipped.
- Offline topology from topology.json: 3 network(s), 3 prefix(es).
- Filters apply per observation: port matches destination port; IP matches source or destination text.
