Azure VNet Flow Traffic Report

Generated 2026-10-19T08:08:39Z | Source local | Window 2026-10-18T10:00:00Z to 2026-10-18T13:00:00Z
Filters: action all; protocol TCP; destination ports 1433; IP contains any; min bytes 0

Summary

Measure	Value
Flow observations	69
Allowed / denied	69 / 0
Bytes / packets	4.1 MB / 6,598
Storage accounts read	2
Scopes in report	2
Subscriptions	0
Unique source / destination IPs	16 / 8
Allowed inbound duplicates skipped	69

Flow log monitoring

No storage account inventory in this run (local input or no accounts discovered).

Notes

- Counts are flow log observations: one per NSG or VNet flow tuple. A flow crossing two logged networks is observed at both; the duplicate allowed inbound observation is skipped.
- Offline topology from topology.json: 3 network(s), 3 prefix(es).
- Filters apply per observation: port matches destination port; IP matches source or destination text.
