# Azure VNet Flow Traffic Report

Generated 2026-10-19T09:58:36Z | Source local | Window 2026-10-18T10:00:00Z to 2026-10-18T13:00:00Z
Filters: action all; protocol TCP; destination ports 1433; IP contains any; min bytes 0

## Summary

| Measure | Value |
|---|---|
| Flow observations | 69 |
| Allowed / denied | 69 / 0 |
| Bytes / packets | 4.1 MB / 6,598 |
| Storage accounts read | 2 |
| Scopes in report | 2 |
| Subscriptions | 0 |
| Unique source / destination IPs | 16 / 8 |
| Allowed inbound duplicates skipped | 69 |

## Flow log monitoring

No storage account inventory in this run (local input or no accounts discovered).

## Traffic between scopes (top 50 by bytes)

| From | To | Flows | Allowed | Denied | Bytes | Share of bytes |
|---|---|---|---|---|---|---|
| stflowlogsapp01 | stflowlogsdata02 | 69 | 69 | 0 | 4.1 MB | |

## Individual view per storage account

### stflowlogsapp01

In: 0 flows, 0 B | Out: 69 flows, 4.1 MB | Denied observations: 0
Top peers: stflowlogsdata02 (4.1 MB)
Top destination ports: 1433/TCP (4.1 MB)

### stflowlogsdata02

In: 69 flows, 4.1 MB | Out: 0 flows, 0 B | Denied observations: 0
Top peers: stflowlogsapp01 (4.1 MB)
Top destination ports: 1433/TCP (4.1 MB)

## Top flows (top 48 of 48 rows by bytes)

| First seen | Source | Destination | Port | Proto | Action | Dir | Flows | Bytes | Rule |

## Notes

- Counts are flow log observations: one per NSG or VNet flow tuple. A flow crossing two logged networks is observed at both; the duplicate allowed inbound observation is skipped.
- Offline topology from topology.json: 3 network(s), 3 prefix(es).
- Filters apply per observation: port matches destination port; IP matches source or destination text.
